

# User manual

**Model: FUT092-FUT039**

**Brand: Mi.light**

## product introduction

FUT092 is a full touch RGB+CCT remote controller, designed by high precision IC with more stable touching. Adopt 2.4G wireless technology, and can control LED bulb, downlight and controller, etc.

## Technical Data

Working Voltage: 3V(2\*AAA battery)

RF: 2410-2472MHz

Modulation Method: FSK

Standby Power: 5uA

Control Distance: 20-30M

Size: 138x56x20mm

## Product Pictures

## Product Function

When touching any button, LED indicating lamp will light.

**Master ON/OFF:**All ON/OFF, control the light ON/OFF

**Color Ring:**Touch the color ring, choose and change the color you want

**Color temperature Line:**Touch the CCT slider, adjust the color temperature

**Saturation Control:**Touch the Saturation slider, adjust the color saturation

**Brightness Dimming:**Touch the Dimming slider, change the brightness(1%-100%)

**Speed+:**Accelerate the present dynamic mode

**Speed-:**Slow the present dynamic mode

**Mode:**Choose dynamic mode

**Zone ON/OFF:**Zone ON/OFF button, control the light ON/OFF。

### FCC Caution.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
